Dear [redacted]

Re: You are entitled to the information you requested - 2021-[redacted]-HEA

The Department of Health and Wellness received your application for access to information under the *Freedom of Information and Protection of Privacy Act* (the Act) on August 23, 2021.

In your application, you requested a copy of the following records:

Amended August 25, 2021:
A breakdown of the following by week:
1. COVID-19 Cases

Our friend in Nova Scotia is back at it again, digging up dirt and information about the tyranny of Robert Strang. Here are some of the latest finds. Previously, there was the hospitalization scam debunked, and the lack of data for masks in schools.

For a nearly 2,000 page compilation of documents (although a lot is redacted), have a good read through this file. Unfortunately, due to a variety of reasons (such as privilege or public

policy), a lot is not disclosed.

Included in the disclosure is this little gem from CADTH and Health Canada. Worth a read.

Looking below at some of these definitions, these are identical to what is released by the World Health Organization. See page 3. Additionally, their "case definition" is certainly worth a look. This is Orwellian Newspeak, with very misleading usage. Also worth noting, if the vaccine kills you, but does so in under 14 days, you are considered "unvaccinated".

> Deceased case
> □ A probable or confirmed COVID-19 case whose death resulted ***from a clinically compatible illness***, unless there is a clear alternative cause of death identified (e.g., trauma, poisoning, drug overdose).
> □ A Medical Officer of Health, relevant public health authority, or coroner may use their discretion when determining if a death was due to COVID-19, and ***their judgement will supersede the above-mentioned criteria.***
> □ A death due to COVID-19 may be attributed when COVID-19 is the cause of death or is a contributing factor.

> Confirmed case
> A person with confirmation of infection with SARS-CoV-2 documented by:
> □ The detection of at least ***1 specific gene target*** by a validated laboratory-based nucleic acid amplification test (NAAT) assay (e.g. real-time PCR or nucleic acid sequencing) performed at a community, hospital, or reference laboratory (the National Microbiology Laboratory or a provincial public health laboratory)
> or
> □ The ***detection of at least 1 specific gene target by a validated point-of-care (POC) NAAT*** that has been deemed acceptable to provide a final result (i.e. does not require confirmatory testing)
> or
> □ Seroconversion or diagnostic rise (at least 4-fold or greater from baseline) in viral specific antibody titre in serum or plasma using a validated laboratory-based serological assay for SARS□CoV-2

Notice that at no time do they ever say that they are testing for a virus.

According to other definitions:
Unvaccinated: Individuals meeting the national confirmed case definition of COVID-19 and having illness onset:
<14 days post first dose of any COVID-19 vaccine
After having received 0 doses of any COVID-19 vaccine
Partially vaccinated: Individuals meeting the national confirmed case definition of COVID-19 and have illness
onset:
≥14 days post first dose of any COVID-19 vaccine or <14 days post second dose of any COVID-19 vaccine Fully vaccinated: Individuals meeting the national confirmed case definition of COVID-19 and have illness onset: ≥14 days post second dose of any COVID-19 vaccine

Anyhow, thank you to the committed people who try to bring out the truth. Your work is sincerely appreciated, even by the silent masses. What's disturbing is just how little truth is shared by our "leaders".

If you think this issue is limited to Nova Scotia, please check out Ontario and Alberta.

And while you're at it, go visit Fluoride Free Peel. This deadly virus has never been isolated, anywhere in the world. The narrative is built entirely on lies.

SEPTEMBER 24, 2021 AT 3:24 PM

Let me get this straight. So those who died WITH COVID were at the end of life. They did not have to be confirmed cases but could be probable and from a clinically compatible illness. The vaccinated need to be protected against the unvaccinate and there needs to be a passport. Those vaccinated are still wearing masks. The ICU COVID hospitalizations in NS was 0.63% meaning that 99.36% were from other health related issues. That those who died of COVID-19, 53 of the 64 in 2020 were in long term care. The 90 people who died of COVID from March 1, 2020 to June 17, 2021 ALSO HAD the following: 6 / 6.7% had cancer, 54 / 60% had cardiac disorders, 10 / 11.1% had chronic renal disease, 19 / 21.1% had diabetes, 5 / 5.6% had immunocompromised conditions, 49 / 54.4% had neurological conditions and 17 / 18.9% had pulmonary disorders. Even though they were AT THE END OF LIFE…they were instructed to mark them down on their death certificate as a COVID-19 death. Now we learn that 483 people in Nova Scotia have had Adverse Events after being vaccinated and Dr. Strang says the vaccine is safe even though there is a 99.7 percent recovery. ————————————————- Is this just nuts or what.
